

This walk was originally led by one of the BPWA founders, Pat DeVito, on Thursday, October 22, 2009. It has a number of steep climbs and can be challenging at times.

Start at the Berkeley Rose Garden under the sign on Euclid.

Walk north along Euclid Avenue to Redwood Terrace (51) and up this steep path (resting as needed) to Keith Avenue at the top.

Turn right and go along Keith to Covert Path (53,54) and up both segments to Keeler Avenue.

At Keeler make a slight turn right to Whitaker Path (60) and walk up the path to Sterling Avenue.

Go right along Sterling Avenue, past the sign for Stevenson Path, to Shasta Path (64) and walk up to Miller Avenue.

At Miller turn left and walk along the street to Stoddard Path (67) and go up the path to Grizzly Peak Blvd.

At Grizzly Peak turn left and walk along the street, past Muir Way on the right, to Bret Harte Lane (72), then down the path to Miller Avenue again.

Turn right at Miller and continue walking, past Latham Lane on the right, to Poppy Path (38); and down the path to Remillard Park. Although we will make short stops on the way uphill to Grizzly Peak Blvd., we can have a longer rest stop, if needed, at the park.

When rested we will walk from the park down along Poppy Lane to Pinnacle Path (37) and down the path to Regal Road and Cragmont Avenue.

At Regal and Cragmont turn left along Cragmont, past Bret Harte Road, to the top of El Mirador Path (50) and walk down the top segment to Keith Avenue.

Turn right on Keith to Bret Harte Way (47) and down the path to Euclid Avenue; turn left and walk along Euclid back to the Berkeley Rose Garden.

This walk has been routed to include 11 named paths or path segments and one park. We will have short stops on our way up to Grizzly Peak Blvd. both for rests and at places that provide wonderful Bay views, if the weather is clear. Many of these paths have been cleared and built by BPWA, under the leadership of Charlie Bowen, with the help of numerous volunteers that included BPWA members, community groups, students and other path users. Because the route includes steep grades and steps, walkers need to be careful, especially on the

way down and where there are no railings as the needles and other debris can make for slippery walking.

Path numbers are in parentheses following the Path names for easy reference to the BPWA path map so that walkers can vary the route to take in additional paths or to configure their own walks while exploring Berkeley's unique path network.
Enjoy!
